

CITIZEN ADVISORY TEAM

What is the CAT?

- The Citizens Advisory Team (CAT) acts as a sounding board and helps the project team understand community issues and concerns
- The group meets regularly to review environmental and technical data, discuss the interests and concerns of their individual communities, and to help find a consensus solution for this complex project
- Ultimately, the CAT will make a recommendation to ADOT; however, the advisory team's recommendation will be only one of many factors considered by ADOT and FHWA in identifying a preferred alternative
